Developing a Model Program for Preparing Saudi Business Teachers

Production and Operations Management

Martin Starr 2004-01 This text has been developed through extensive research to reflect both the new practices and traditional concepts that instructors feel are important for students to know. Starr uses real-world themes such as quality, technology, people and teamwork, globalization, services and manufacturing, environmental awareness and initiatives, and problem solving. Four real-world cases are included spotlighting Tony’s of Maine, Rosenblith International, Global Concepts Inc. at Celestica’s Facility in Little Rock, and the Saturn Corporation on quality, service, smart technology, and the environment, respectively. This text follows a systems approach that is both systematic and constructive. Starr integrates OM decisions with the functional areas of business whose challenge is to make the firm perform as a team. It combines the methods of analysis and synthesis, which lead to better decisions and problem-solving skills for complex situations.

Tourism Management

David Weaver 2006 Tourism Management, third edition builds upon the strength of the previous editions by introducing students to the complexities of the tourism system. The third edition has been updated with recent industry and research developments and retains the thoroughness of content and application that were established in the previous editions. A theme of this edition is looking at the challenges of tourism in a time of regional and international uncertainties and complexities as a consequence of terrorism and security threats; health issues such as SARS, natural events such as the Boxing Day tsunami and the changing geopolitical landscape. Features: New Technology in Tourism highlights the increasing role of technology tools and systems in the tourism industry, including virtual reality, artificial reefs, geographical information systems, energy cogeneration and hand-held computers. Australian and international statistics and information updated as of 2004 Increased coverage of regional tourism issues and initiatives More coverage of the key tourism players: government, industry and individuals, and their role in managing tourist systems in times of uncertainty A thorough discussion of the economic, sociocultural and environmental impacts of tourism A chapter on sustainable tourism including ecotourism, sustainable mass tourism and industry responses and practices A chapter on tourism research, which introduces students to the important role of research in tourism Three practical features in each chapter illustrate and reinforce the theory: Managing Tourism: illustrates how a tourism-related process, destination or company has been managed and considers the issues involved in doing so. Topics include mega cruise ships, Schnellads on the Gold Coast, tourist and dingo interactions on Fraser Island and the 100% New Zealand campaign Contempory Issues: a brief case study discusses a contemporary tourism issue such as the effect of terrorism on tourism, the role of movies and TV in triggering tourism development, and the implications of climate change, ‘fack’ tourism and conducting research with Aboriginal Australians development in the tourism sector; including outer space tourism, and webcasting.

Punishment Under Pressure

Boh Broad 1991 Arguing that while certain aspects of the probation service community developments are suitable for addressing social problems in inner-city areas, progressive probation practice retains innovative status. The book examines the construction and presentation of Social Inquiry Reports, anti-racism, group work, probation clients and unemployment, the disproportionate number of black people in custodial institutions and inter-agency work.
