Understanding Associations between Race, Socioeconomic
Racial and ethnic stigmatized peoples experience higher rates of illness, impairment and death than the average of their societies in the U.S. and globally (Williams 2012). Across multiple health outcomes, these disparities are also seen in the earlier onset of illness, more severe disease and poorer quality of care for racial/ethnic minorities compared to their majority peers.

What Are MGUS, Smoldering and Active Myeloma? | The IMF
Aug 01, 2019 · Patients must undergo a careful diagnostic workup to stage their disease. Before developing active myeloma, patients pass through two earlier disease stages. These precursor stages are monoclonal gammopathy of undetermined significance (MGUS) and smoldering multiple myeloma (SMM). What Is MGUS? The earliest stage of myeloma is not cancer at all. Rather, this stage is a ...
